SmartSTREAM
bluetooth / wifi

stream **music** to your **spa**
and **control** your spa via wifi

BLUETOOTH STEREO	**WIFI REMOTE ACCESS**	**SPALINK APP**

The SV SmartSTREAM module is an all in one, purpose built, high definition sound system for your spa with Bluetooth® connectivity that also includes a WiFi module for remote access control of your spa via the SpaLINK smart device app.

The SmartSTREAM module contains an advanced high efficiency MOSFET four channel 50W amplifier and a 150W amplifier to drive the subwoofer. The Bluetooth module receives audio stream direct from your smart device (phone/tablet) and three (3) x auxiliary audio input sources are provided to enable audio connection to a TV/DVD/iPod Dock/MP3 player (if required). The SmartSTREAM pool side keypad provides complete control of your audio experience allowing adjustment of volume, play/pause, skip tracks, mute, fader, balance, treble, midrange, bass, subwoofer levels and sub frequency.

The SmartSTREAM module can operate as a standalone stereo system for your spa, or can be used as both a stereo and WiFi remote access module to your SV series spa controller.

SPA CONTROLS

SpaLINK
smart device app

control your spa remotely from anywhere in the world

The SpaNET WiFi module and SpaLINK smart device app allow you to connect to, and take control of your spa via a WiFi, 3G or 4G network, providing access to your spa from any location at any time. The SmartSTREAM module connects to any model SV series spa controller and then uses your home WiFi network to facilitate communication between the app server and the spa.

The SpaLINK app for your smart device (Apple®/Android™) becomes a wireless remote for your spa enabling complete control over all spa accessories including pumps, air blowers, and LED spa lights. In addition the app provides total control over every possible spa configuration setting. There are no shortened menus or minimal access to limited settings. The SpaLINK app allows complete adjustment of all spa control settings as if you were standing in front of the spa.

Simple to use touch screen menus make adjusting the temperature, selecting your desired heating mode, programming filtration, sleep or power save timers and other such settings a breeze. Even if you have never owned or used a spa pool before, from the moment you open the app you'll be driving the spa like you were a professional.

global remote technical support via wifi

If you activate the support pin within the SpaLINK app, SpaNET can securely access and adjust software settings and see historical and real-time diagnostic data. This allows us to provide remote technical support across the globe without the need for a technician to visit the spa.

WIFI SPECIFICATIONS

Connection Type	WiFi Only
WiFi Technology	2.4Ghz IEEE 802.11 b/g
Antenna	5db (SMA connector)
